## Company Overview

Systems Technology Group, Inc. (STG) is an Arizona-based technology consulting firm that provides a full range of information technology products and services to small and medium-sized businesses and government agencies.

Our services go beyond traditional IT consulting and web design services. STG focuses on superior web design as well as internet strategy, software development, hosting & managed services, and IT Staffing.

STG excels at providing technology solutions for small to medium-sized businesses, startups, large corporations, and city, state, and county government agencies. STG creates value by helping clients rapidly develop and deploy productive Internet solutions. We create this value through a business model that emphasizes close-knit multi-disciplinary teams, an integrated service model, and growth that reinforces the firm's culture and continuous innovation.

**IT Staffing** • we provide specialized talent that will drive profits for your company.

**Software Development** • we provide software development, and integration services on Microsoft's .NET technology stack. We specialize in desktop-like web solutions, such as Rich Internet Applications (RIA), Software-as-a-Service (SaaS), Web 2.0/Ajax Applications, Cloud Software, and Mobile Applications.

**IT Consulting** • we have expertise in virtually every aspect of Systems Engineering, Software Development, and Technology Solutions. Our long experience in delivering complex solutions for our clients has taught us the skills and leadership to manage large-scale complex consulting engagements.

**Web Design** • our sites are developed with an eye for exceptional visual presentation, the highest standard of professionalism, and an eye for your strategic objectives.

**Internet Strategy** • we help you by asking the right questions, understanding your business objectives, and developing bulletproof strategies that deliver your message to an online audience and meet the ever changing demands of the Web.

**Web Hosting** • we provides services to businesses and organizations implementing complex, mission-critical web sites and web-based applications in a 24x7 operation.
